

## Features in Rugby GamePlanner Version 3.0

### Launch Date June 2006

#### Plan creation and amendment

- Create a plan selecting from a choice of backgrounds – grid (dimensions set by user) including sub-division markings, vertical pitch markings or horizontal pitch markings
- Create plans from Scrums and Lineouts and Re-Starts (Kick-offs, Drop Out 22, Tap Penalty and Free Kicks)
- Choice of 5 team playing numbers, from 7, 9, 11, 13 and 15 a-side
- Various Scrum options, including wheeled scrum and selection of ball channels
- Various Lineout options, including player numbers and positions
- Specify Ruck and Maul situations, including specifying players involved and roles for other players
- Drawing Tools for player, ball, line of running, pass, kick, lob pass
- Add cones and training equipment
- Highlight player to demonstrate role in plan
- Add annotation to describe player's role in a plan
- Change player's number/initials and shirt colour
- Complete control over player and ball speed
- Delay player for selected number of frames
- Drawing Tools of plan/drill annotation – directional arrows and text (font, pitch, colour, etc set by user)
- Multi-select Tool so amendments can be made to a number of animation symbols at the same time
- Display Gridlines, in intervals from 1 metre to 30 metres
- Scribble lines, for ad-hoc markings on a plan/drill
- Add multiple video and audio clips to plans
- Set player speeds, for each player and at each node of a run
- Set the ball speeds for passes, crosses and shots
- Hide show players for better understanding of players role

#### Plan / Drill animation

- Plans / plans are animated to show simulated motion of players and balls
- Replay speed can be varied between very fast to very slow, and also frame-by-frame
- Stop plans at any point
- Show video clip or play audio clip at any point
- A Frame Counter displays the current position in the plan
- Buttons enable the user to navigate to first frame, last frame, or to fast-forward or fast-reverse through the animation
- Quick and easy navigation between Edit and Action modes

#### Plan / Drill management

- Plans / plans are saved into a database
- Plans can be organised into a user-defined filing structure
- Plans / plans can be amended, cloned, printed and deleted

### Plan / Drill management con't

- Comprehensive notes can be recorded for each plan, including a description, coaching notes and equipment requirements
- User-defined Search Tags can be set-up and linked to plans. These can be used to help search for specific groups/types of plans at a later date
- Exporting plans and plans to file, including automatic attachment to an email
- Importing plans and plans from other users

### Plan Overview

- Create and amend an Overview image of the plan, showing key events
- Add and maintain additional text and lines
- Print and email the Plan Overview Image

### Coaching profile

- Facility to provide information about the coach when sending plans and sessions
- An image of the coach can be attached to their profile

### Club Details

- Maintain details of club coaches and officials, including their role and contact details
- Record notes on the club
- Specify a club captain
- Set the club colours

### Teams

- Maintain details for all teams in a club, from first team through to junior teams
- Specify team coach and captain
- Specify team playing formation
- Record notes on each team
- Export team details to file, including automatic attachment to an email
- Importing team details from other users

### Players

- Maintain details of all players in a club
- Attach a player image
- Maintain contact and registration details
- Maintain a training plan
- Maintain injury and general notes, including the attachment of images and video clips
- Maintain match and player stats
- Export player details to file, including automatic attachment to an email
- Importing player details from other users

### Fixtures

- Define seasons and competitions
- Add fixtures for all teams in a club
- Record full details, including venue, kick-off date and time, the match officials, weather conditions, and pre and post match notes
- Create team selections for the forthcoming fixtures
- Review the previous weeks team selection
- Create, print and email team sheets
- Flag players as Unavailable for selection
- Review fixtures for specific competitions or for specific seasons
- Maintain match statistics including scorers, tackle count, fouls committed, cards given, etc
- Review match statistics by team/player, for specific season/competition
- Export fixture details to file, including automatic attachment to an email
- Importing fixture details from other users

### The Calendar

- Create training sessions, including notes, session objectives, post session notes, venue and plans/plans to be used during the session
- Add Player Analysis to sessions
- User definable screens for capturing training session details and player analysis
- Print and email training sessions
- Copy and paste sessions to another date
- Clone sessions
- Amend and delete sessions
- Search for sessions utilising a variety of search criteria
- Add and amend fixtures
- Export session details to file, including automatic attachment to an email
- Importing session details from other users

### Printing

- All plans and database information can be printed
- A large number of pre-defined formats and layouts are available
- User defined Heading and Footer can be specified
- Additional formats and layouts can be included
- Documents can be printed, viewed in Print Preview, or exported to another document format (Word, Excel, HTML or email)
- Plans can be printed with the Plan Overview Image, or the Plan Animation Image, in colour or black and white

### System Customisation

- User definable Playing Positions
- User definable Player Roles
- Maintain Competition details, including point allocation
- Maintain Fixture Seasons
- Add and maintain Labels for use in user definable data capture screens
- Maintain default screen layouts for Plan Requirements, Training Session Details, Player Analysis and Fixture Player Analysis

### Help and Support

- Comprehensive Help system
- Video tutorial
